

Innovative Treatment of the Causes of Pain in Lower Back Area (Lower vertebrae)

The cause of the problem in lower vertebrae area can be naturally treated and prevented by ***Dr Allen's Device for Lower Vertebrae Care***. It is important to underline that this treatment is free from any adverse side effects.

Unique Thermobalancing Therapy for the problem in Lower Vertebrae Area

The sooner you start to use the advanced natural treatment provided by ***Dr Allen's Device for Lower Vertebrae Care*** the better chance you will have for full recovery. This treatment provides pain relief naturally.

What you need to know about Lower Vertebrae Problem

The vertebrae column is an important bone structure which protects the 'spinal brain' that is responsible for communication between the organs and systems of our body. When we speak about its care we mean that attention must be drawn not only to the compact bones of the vertebrae but also to the complex tissues surrounding this bone structure which work together as the organ – 'vertebrae'.

For example, when we discuss 'lower vertebrae problem' we mean that disorder which appears in a complex organ located in the lower back and consist of these vertebrae bones, inter-vertebral discs, ligaments, muscles, blood vessels and nerves. These different tissues are bounded together very tightly to make it possible for them to carry out many tasks, like stability and movement of the body, protection of the spinal brain and tubes for nerves. Any problem in any of these tissues will affect the others around.

Dr Allen's Device for Lower Vertebrae Care:

Specially designed, ***Dr Allen's Device for Lower Vertebrae Care*** is comfortable to wear and it will not affect your day-to-day activities, offering a range of unique benefits:

- Thermobalancing treatment relieves pain in lower vertebrae area naturally, without resorting to medication;
- ***Dr Allen's Device for Lower Vertebrae Care*** reduces the swelling around the lower vertebrae area;
- Thermobalancing therapy helps to recover the ensuing numbness or weakness in your back;
- Treatment offered by FineTreatment promotes healthy functioning of the lower vertebrae area.

More information about the device can be found on the Fine Treatment website:
<http://www.finetreatment.co.uk/natural-alternative/vertebrae-treatment.html>

Innovative ***Dr Allen's Device for Lower Vertebrae Care*** takes care of the vertebrae column and provides pain relief effect. The lower vertebrae area is a very sensible place of the body because it gets constant pressure from the upper body, therefore, it is apparent that wear and tear processes are common in it, and start them earlier than in other parts along vertebrae. Specifically these wear and tear processes are fertile soil for arthritis and degenerative changes in the spine which lead to pressure and irritation of a nerve that travels from the spinal cord through the bones of the spine; the muscles tense goes up and people experience lower back pain.

Most commonly pain in lower vertebrae area is caused by muscle strain associated with heavy physical work, lifting or forceful movement, bending or twisting, awkward positions, or standing in one position too long. When the lower vertebrae area is healthy this pain goes away. However, if there are problems in lower vertebrae the pain becomes chronic.

**Thermobalancing Therapy
for Lower Vertebrae Area**

Dr Allen's Device for Lower Vertebrae Care for the first time in the world provides pain relief naturally without adverse side effects. The innovative device treats the cause of the problem in your lower vertebrae area naturally and prevents the need for potentially harmful medications and future surgery. This Thermobalancing treatment is free from herbal remedies or constrained diet.

Compare this with the current mainstream and complementary therapies approaches to lower vertebrae problem treatment

- 1. Complementary therapies** recommend different herbal remedies or applications for back pain treatment; however none of them tackles the cause. The hopelessness of herbal or other types of complementary therapies are the reason why people who suffer from vertebrae problem are compelled to look for surgical solutions.

Mainstream medicine tries to help suffers by numerous medications and various other procedures including surgery, however they do not tackle the cause of the disorder.

It must be noted that even when lower back pain is reported by patients early on, their doctors usually cannot find a precise reason for this sign of trouble. Painkillers, therefore, are widely prescribed but they do not cure the cause of the problem and the symptoms gradually develop into a serious inter-vertebral discs disorder. This stage of the problem is very difficult to treat. It is hard to reverse the changes in the inter-vertebral discs.

- 2. Taking pain-killers** block not only pain signals to the brain but also useful ones which are essential for normal functioning of the body. In addition, there is an

increased risk of gastrointestinal complications ranging from stomach pain to ulcers, haemorrhage, and severe and potentially deadly gastrointestinal problems, often necessitating surgical intervention which in turn worsens general health in the long term.

3. **Complications arising from back operations include:** infection, spinal fluid leaks, nerve damage and paralysis.

Thermobalancing Therapy for Lower Vertebrae Area

*Usually pain relief comes **within the first hour of use**. However it takes time to treat the cause of the pain. Recent onset pain should be completely treated **within 3 months**; longer existing symptoms of pain should be cured by a year but can take longer. Though it takes time to treat the cause of the problem, your symptoms will be alleviated quickly. It is important to underline there are **no adverse side effects**.*

To conclude: ineffectiveness of Complementary therapies in regards of lower vertebrae treatment is the reason why suffers look for medication or surgical solutions, which treats the symptoms of back pain, not of its cause, when **Dr Allen's Device for Lower Vertebrae Care** is naturally decreases pressure inside the tissue by targeting the cause of the pain in lower vertebrae area.

The cause of Lower Vertebrae Problem

The exact cause of intervertebral discs problems were unknown but are commonly thought to involve a slipped or herniated disk. 'The Theory of The Origin of Health Disorders', written by Dr Allen explains that:

- Inordinate pressure on the lower vertebrae area is the initial trigger in developing lower back pain which can cause a disturbance in the supply of water and nutrients to the intervertebral discs.
- As a result of their malnutrition, wear and tear of the intervertebral discs occurs that changes their shape. Such deformation irritates the surrounding tissue.
- In order to restore the discs the surrounding tissue reacts by increasing of the number of capillaries and thus the tissue around them swells.
- The vertebrae have unique strong construction which includes bones, discs, muscles and ligaments therefore when huge pressure builds up inside the affected area the essential tissue does not get enough blood. This in turn lowers the temperature in this tissue which worsens the situation because it leads to the expansion of extra capillaries, consequently to an additional pressure.
- This pressure increases pain, stiffness and immobility, worsens metabolism of the intervertebral discs and leads to the development of permanent lower vertebrae disorder.

In order to stop the swelling and thus to remove the pressure in the vertebrae and pain, it is essential to calm the capillaries, stopping their growth by normalising the temperature in the damaged area. It will improve the metabolism of intervertebral discs freeing the surrounding tissue from pressure and pain. ***This is the only harmless way to get rid of lower back pain.***

How the Thermobalancing Therapy Tackles the Cause of Pain in Lower Vertebrae Area?

Specially designed, ***Dr Allen's Device for Lower Vertebrae Care*** will take care of your vertebrae. The device is comfortable to wear and it will not affect your day-to-day activities.

The spinal cord controls every movement and function of the body. The motor nerves which spread out of the spinal cord supervise movement and the sensory nerves enter into the spinal cord communicating messages from the body back to the brain. Together, the motor and sensory nerves form more than 50 nerve roots, which run through holes, called foramina, in the bones of the spinal column. Each one of these nerve roots has the potential to become irritated and cause back pain.

Natural Treatment for Lower Vertebrae Area

Unique natural thermo-elements are a major component of Dr Allen's therapeutic Device which creates an ideal environment for the capillaries to stabilise the body temperature in the tissue of affected vertebrae area and supply it with all necessary nutrients, thereby helping the lower vertebrae area to recover. Pain and other symptoms can disappear within 1-2 days without taking painkillers.

Also the problem with intervertebral disc puts greater pressure on the nerve root. In the lower back, the nerve roots lead to the legs and irritation may cause not only back pain, but also pain that radiates down one or both of the legs, usually named sciatica. There also can be other symptoms, such as numbness around the genitals, buttocks, weakness in legs and loss of bladder/bowel control if a nerve root in the lumbar spine is irritated.

Protection is only one to treat Lower Vertebrae Area with ***Thermobalancing therapy*** the cause of a problem that appears in your vertebrae area as soon as possible. Overloading or tear or wear are most common initial triggers that making the tissue around vertebrae react by constriction or swelling. Indeed these factors increasing a pressure inside the 'vertebrae' which generates pain.

Dr Allen's Device for Lower Vertebrae Care provides long-term treatment for the cause of back pain, based on '*The Theory of the Origin of Health Disorders*', written by Dr Simon Allen.

Dr Allen's Device for Lower Vertebrae Care is available exclusively through the FineTreatment.co.uk website:

<http://www.finetreatment.co.uk/index.php?act=viewProd&productId=4>

The natural thermo-elements, a major component of Dr Allen's therapeutic device, bring pain relief effectively. By making temperature constant in the affected area of the back, Dr Allen's Device creates an ideal environment for the capillaries to stabilise the body temperature around the sciatica tissue, improves blood flow in capillary nets that supplies the tissue around with all necessary nutrients, thereby helping the area to

recover. A treatment with Dr Allen's Device for Lower Vertebrae Care is effective, when the device is worn precisely over this swollen painful area.

"Everyone will sooner or later benefit from this new method of preventing and treating back pain," highlights Dr Allen. "It is an absolutely natural way to help your body tackle disorders by targeting their actual causes, without creating any adverse side-effects."
